

# INTRODUCTION

Soyntec® thanks you for buying one of the WiFFinder™ bags (executive, messenger or backpack). We wish you enjoy using it.

The WiFFinder™ series shoulder strap allows you to know the WiFi signal levels no matter you are, only by pressing a button. Style and technology joined to create the Soyntec® laptops collection.

We recommend reading this user manual in order to enjoy the product in a safe way and with the best features.

## CARE AND MAINTENANCE

- Do not expose your WiFFinder™ bag to shakes, dust or water.
- Do not use abrasive or corrosive cleansers.
- Keep the WiFFinder™ device clean and without dust.
- Use to clean it a soft and dry cloth.
- Replace the batteries when it's been depleted.
- Do not disassemble the device. Any repair work must be performed by qualified Energy Sistem Soyntec's personnel.

- Removable cover protection laptop

## **PRODUCT CONTENT**

- WiFFinder™ bags (Executive, messenger or Backpack).
- WiFi Finder – clock.
- User's Manual.

## GENERAL OVERVIEW

- 1) LCD Display with clock
- 2) Hours button
- 3) Minutes button
- 4) WiFi detector button

## **BATTERIES REPLACEMENT**

- Your WiFFinder™ bag has included 2 CR2032 lithium batteries in the WiFFinder's rear.
- If the devices detecting stance is shorter than usual, this may indicate that the batteries need to be replaced.
- To replace the old batteries for other new ones, open the back cover of the battery compartment.
- Take out the two CR2032 lithium batteries and replace with two fresh batteries.
- For this, please replace it in a correct way (“+” towards outside, “-” towards inside).

## HOW TO OPERATE

- Press the small buttons, one to adjust the definite hour you need, the other to adjust minutes.
- Press the big button lightly four inclined should flash one by one. This means the device is searching for a signal.
- After searching, the four inclined indicators till on it and how many signals you got depends on signal status. If there is no signal bar inclined on it (after flashing), it means no signal or too weak of a signal for the device to detect.
- If only the first indicator come on till two seconds (after flashing), a weak wireless signal has been detected. A wireless connection is possible, but may not be stable.

## HOW TO OPERATE

- If both the first and second indicator come on and till two seconds (after flashing), the device has detected a good wireless signal. The area is favorable for accessing a wireless internet connection.
- If all the indicators come on till (after flashing), the device has detected a very strong wireless signal. The area is ideal for accessing a wireless internet connection.
- Once the button is pressed one time, the WIFI finder will search for a signal for 3 seconds. If no wireless signal is detected after 3 seconds, it's advised that you move to another area to search for a connection.
